SUMMARY

Java Full Stack Developer with strong backend focus in Spring Boot, Spring Security, and REST API development. Experienced in building production-style applications with authentication, payment integration, Docker, and database design. Interested in backend engineering roles and scalable system design.

EDUCATION

Malout Institute of Management and Information Technology
B.Tech in Computer Science Engineering

Punjab, India
2023 – 2027

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, HTML, CSS

Backend: Spring Boot, Spring Security, Spring MVC, Hibernate, JWT, REST APIs, JPA

Frontend: React.js, Bootstrap

Database: MySQL, MongoDB

Tools: Docker, Git, GitHub, Postman, Swagger, IntelliJ IDEA

CS Fundamentals: OOP, DSA, DBMS, System Design Basics

PROJECTS

BookStore - Full Stack E-Commerce Platform

(Spring Boot + React)

- Built full-stack e-commerce application using Spring Boot and React with layered backend architecture.
- Implemented JWT-based authentication, role-based access control (Admin/User), and secure APIs.
- Designed and developed 20+ REST APIs for products, cart, orders, wishlist, and user management.
- Integrated payment gateway and email notification system for transactions and password recovery.
- Implemented pagination, filtering, search, validation, and global exception handling.
- Used MySQL with JPA/Hibernate and containerized system using Docker and Docker Compose.
- Documented APIs using Swagger and tested backend using Postman.

CERTIFICATIONS / EXPOSURE

Docker and Containerization fundamentals (hands-on project experience)

Spring Boot backend development (REST APIs, Security, JPA)

Git & GitHub workflow for version control

ACHIEVEMENTS

Built a production-style full-stack system with authentication, payments, and Docker deployment.

Strong understanding of backend architecture, REST API design, and database modeling.
