SUMMARY

Java Full Stack Developer with experience building production-style applications using Spring Boot, React, TypeScript, MySQL, and REST APIs. Skilled in designing secure backend systems, developing responsive user interfaces, and deploying scalable full-stack applications.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frontend: React.js, TypeScript, Tailwind CSS, Bootstrap, Framer Motion, Axios

Backend: Spring Boot, Spring Security, REST APIs, JWT Authentication, Hibernate, JPA, Maven

Databases: MySQL, PostgreSQL, MongoDB

Tools: Git, GitHub, Docker, Docker Compose, Postman, Swagger, Vercel, Render

Core Concepts: Object-Oriented Programming, MVC Architecture, Layered Architecture, REST API Design

PROJECTS

BookStore – Full Stack E-Commerce Platform

Spring Boot, React, MySQL

- Engineered a production-style full-stack bookstore application using Spring Boot, React, MySQL, Spring Security, and JWT Authentication.
- Developed 25+ REST API endpoints supporting authentication, book catalog, shopping cart, wishlist, order processing, and role-based admin operations.
- Designed a layered architecture following Controller → Service → Repository pattern using Hibernate/JPA and MySQL.
- Implemented search, filtering, pagination, and role-based dashboards to improve user experience and interface functionality.

PoshanSetu – Nutrition Monitoring Platform

Spring Boot, React, MySQL

- Collaborated in a team of three to develop an AI-assisted nutrition monitoring platform for Anganwadi workers, parents, and administrators.
- Developed backend modules using Spring Boot by implementing REST APIs, Spring Security, JWT Authentication, and role-based authorization.
- Integrated frontend dashboards with backend services for nutrition tracking, child health records, and growth monitoring.

Developer Portfolio

React.js, TypeScript, Spring Boot

- Designed and developed a premium chess-inspired developer portfolio using React.js, TypeScript, Tailwind CSS, and Framer Motion with a strong focus on UI/UX.
- Built reusable React components, responsive layouts, Framer Motion animations, and integrated a Spring Boot backend for contact management.
- Deployed the frontend on Vercel and backend on Render with environment-based configuration for production readiness.

EDUCATION

Malout Institute of Management and Information Technology, Punjab, India

Bachelor of Technology in Computer Science Engineering

2023 – 2027 — **CGPA: 7.5/10**

ACHIEVEMENTS

Built and deployed multiple production-style full-stack applications using Spring Boot and React on modern cloud platforms.

Designed and developed a responsive developer portfolio showcasing engineering projects and interactive case studies.

Solved 100+ Data Structures and Algorithms (DSA) problems on modern coding platforms, strengthening problem-solving skills.
